

CREW MASK TEST SYSTEM

Are you looking to grow your oxygen mask repair business?
Are you committed to improving your efficiency while testing?

The AMI **Crew Mask Test System** is an automated computer-controlled system designed to test oxygen masks and regulators. It is used by prominent FAA repair stations and manufacturers of oxygen mask equipment. This proven system enables the user to test more efficiently and accurately while reducing labor requirements.

System Features

- Automatic Altitude Testing
- Operator freed to do other work
- Automated Reporting
- Stored Test Programs
- Complies with Manufacturers' CMMs
- Tests both BE Aerospace and EROS/AVOX
- User Programmable
- Regulator Adjustment at Altitude

System Tests

- Crew Mask
- Regulator
- Stowage Box
- Microphone
