

REGULATOR EXERCISER

Save time and money with the Regulator Exerciser!
Improve your efficiency while testing?

The AMI **Regulator Exerciser** will exercise the regulator according to CMM requirements. Once the proper settings are made, the exerciser will run unattended. The Regulator Exerciser can be used with the Crew Mask Test System to offload the exercising of the regulator so more masks can be tested. This low cost tool will make your repair shop more efficient.

System Features

- Runs Unattended
- Works with BE Aerospace and EROS/AVOX
- Settable Pressure (0 to 1 MPa)
- Monitors Inhalation/Exhalation Resistance
- Selectable Breathing Rates (0-30 breaths per minute)
- Settable Tidal Volumes (0 to 2 liters)
- Settable Cycle Count

System Tests

- Life Cycle
- Irregularities
- Connectors
